EDUCATION

University Of Houston

Bachelor of Science, Computer Science

Houston, TX

Expected May 2026

Relevant Coursework: Data Structures and Algorithms, Software Design, Operating Systems, Database Systems, Automata, Computer Architecture, and Discrete Math

EXPERIENCE

Lead Instructor

Coder Kids

March 2023 – July 2023

Houston, TX

- Taught foundational programming concepts to up to 20 students at a time, aged 5-10, using Scratch, emphasizing logic, loops, and event-driven development.
- Instructed beginner Python programming, introducing syntax, variables, and control flow, and led interactive game development projects using the pygame library.
- Utilized strong communication skills to adapt technical instruction for various age groups, ensuring engagement and comprehension across a range of learning styles.
- Demonstrated leadership by mentoring students through challenges, fostering confidence, and encouraging problem-solving and creativity in coding.

PROJECTS

Cardio Medical | *JavaScript, HTML, CSS, Supabase - In Progress*

May 2025 - Present

- Developed a responsive website for a student-led medical organization using HTML, CSS, and JavaScript to provide resources, updates, and information.
- Collaborated with a team of 10+ members to gather requirements, implement design feedback, and ensure the site meets the organization's branding and functional needs.
- Implemented Supabase backend providing user authentication and database management for a blog system with real-time data synchronization and secure user sessions.

Online Portfolio | *ReactJS, JavaScript, HTML, CSS*

August 2025

- Developed and deployed responsive personal portfolio website to showcase software projects, technical skills, and professional experience with modern web development practices.
- Built reusable React components with component-based architecture, implementing responsive design and interactive UI/UX features for optimal cross-device user experience.
- Configured CI/CD deployment pipeline using GitHub Pages with custom domain integration via Cloudflare DNS management for secure content delivery and performance optimization.

GuessPKMN | *ReactJS, TypeScript, HTML, TailwindCSS*

September 2025

- Built interactive web application that challenges users to identify Pokémon through gamified quiz mechanics with point-based scoring system and randomized content generation.
- Integrated RESTful API to fetch and dynamically render data for 1,025+ Pokémon entities with type-safe interfaces and component-based architecture.
- Engineered randomization algorithm and real-time scoring system with persistent state management, implementing performance optimization through lazy loading and data caching.

AI Assistant Chatbot | *JavaScript, NextJS, Postman, OpenAI*

August 2024

- Developed AI-powered chatbot application with server-side rendering and RESTful API integration, enabling dynamic conversational interactions through natural language processing.
- Implemented asynchronous API calls with state management for real-time response handling, optimizing user experience with seamless conversation flow and error handling.
- Tested and debugged backend endpoints using Postman to validate request/response cycles, ensuring reliable integration with external AI services and API functionality.

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, TypeScript, HTML/CSS

Frameworks/Libraries: React.js, Next.js, Tailwind, Supabase, Bootstrap, pygame

Tools/Technologies: Git, GitHub, Subversion, Postman, Cloudflare, VSCode
